

The 365Ops App

Back-office operational insights in-hand and on-demand.

Unattended retail is synonymous with 24x7 availability, which means food service operators need similar tools to help them manage their business from anywhere, at any time.

With the 365Ops App, important back-office functionality and insights from all 365 Connected CampusSM solutions are now available on the go, without needing to login to ADM. With this intuitive mobile user interface, executives and route drivers can now:

Ensure Market Uptime at the Point-of-Sale

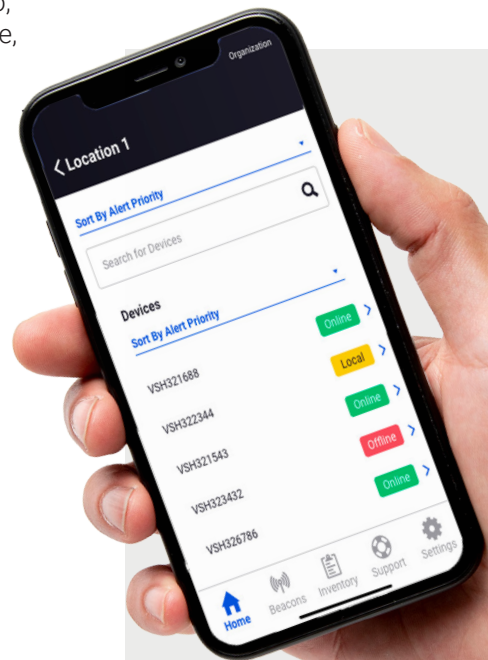

- View real-time device status and sort alerts by priority across all locations
- Sync and reboot devices remotely
- Perform vending diagnostics and test vends
- Connect with 365 Support services for assistance

Make Market Updates Right in the Field

- Quickly deploy 365 Beacons as an additional self-service checkout option for consumers and relocate them when needed.
- Manage inventory and make changes to planograms
- Take photos and update menu product images with 365Dining solutions.

Track Market Sales Performance

- View sales data at the organizational and individual location level
- Get a snapshot of daily revenue and average transaction amounts
