

Spoonfed Marketplace

The catering solution and opportunity to service your client's non-vending needs

Create a branded online hospitality ordering platform and give your clients access to local food vendors of your choosing.

- Provide an enhanced, bespoke solution for your clients who order hospitality
- Enhance the selection you offer with greater variety
- Offer ordering from external local vendors, commissary kitchens and your own kitchens
- Engage with smaller kitchens in your area
- Generate an additional stream of revenue

► How Does It Work?

Provide more value for your existing client relationships. You can now partner with local food vendors that will be featured on your branded ordering portal. The ordering client can access new vendors, browse menus, build orders and checkout with ease.

Simple, confident processes

Clear ordering experience, with email confirmation.

Upon order submission, vendor is alerted and uses Spoonfed BOH modules to process and execute the order accurately and efficiently.

Spoonfed's comprehensive software allows delivery to be pinpointed to a building, floor, room, or desk!

Perfect for managing recurring orderings of pantry items such as dairy, fruit, tea/coffee, etc. as well.

► Comprehensive Control for All

Location Manager has full visibility of all orders via digital calendar and can manage arrival of orders easily, control access and provide clear concise instructions for local food partners.

Account Manager can utilize BoH modules to manage and report all aspects of operation as required.

Scalable. Manage across multi sites.

Your Marketplace portal is exclusive to you and your clients, so you can work with each vendor on specific menu and price offerings.

“ Embracing technology-based solutions like the Spoonfed platform ultimately allowed us to extend our reach and drive revenue. ”
