

# Vending Management System

Spend less, sell more, and control your operations.

Manage micro markets, vending, smart stores, and office coffee business lines in one unified system.

- **Dynamic Routing**  
Eliminate unnecessary stops and only service locations that need it.
- **Precise Prekitting**  
Bring exact product to each location, helping you service more efficiently.
- **Merchandising & Optimization**  
Increase POS sales by optimizing product planograms.
- **Actionable Reports**  
Choose from hundreds of detailed reports to gain insights on your operation.

## Run Better Routes

Service locations exactly when they need it. Plan your routes based on factors that are important to you like cash to collect, sold outs, inventory levels, and more. The VMS will help you plan more efficient routes - helping you save time and money.

## Improve Your Prekitting

Pick exact products for each location ahead of time. Use the VMS to know exactly what products your points of sale require. Easily load your trucks with the exact product type and quantity that every stop on your route needs. Save time on each POS service and eliminate product returning on your truck.

## Optimize Your Products

Increase account sales by optimizing your planograms. View product recommendations for each point of sale across your operation. Replace slow movers with high demand products and watch your sales soar. Boost sales across vending machines, micro markets, smart stores, and more.

## Consult Helpful Reports

Run detailed reports to get a better understanding of your operation. Generate hundreds of different reports including route sales, over/shorts, commissions, and more. Find insights about your company and take action to run a better operation.
